In the Abstract

Please replace the abstract starting on page 82 at line 5 with the following Abstract:

The present invention relates to pyrrolidine compounds of the general structure:

where  $n$  is an integer 1-6 and  $R$  is hydrogen or a  $C_1$  to  $C_6$  straight chain or branched alkyl group, and wherein when  $n=1$ ,  $R=CH_3$  or  $H$ , useful for re-sensitizing vancomycin resistant Gram-positive bacteria in which resistance results from the conversion of an amide bond to an ester bond on the cell wall peptide precursors of the bacteria.
